ABOUT US

→ USEFUL TECHNOLOGY. WITHOUT FUSS

We offer realistic technology for everyone.

Neither better nor worse. We are different.

We know you are more than an @

We hate ghosting. We always answer.

Irreverent humanity. Revolutionary.

We are at the top of the game with our products.

We get to the point. We do not mince our words.

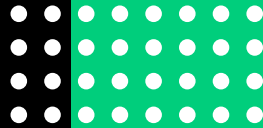

We believe in a more sustainable future.

We do not stop.

We take the #NOBULLSHIT to the limit.

#NOBULLSHIT TECHNOLOGY

Whoever you are, find the latest electric bikes and scooters at Youin. We want to live longer and better. That is why we contribute to sustainable urban mobility. Meaningful mobility without nonsense.

¿Will you join us?

CITY BIKES

URBAN AND TOURING EBIKES

Discover the best urban, touring and folding electric bicycles for your city trips. Do you dare to leave the city on a FAT bike? Find the Youin model that suits you best.

A person wearing a dark denim jacket and black pants stands next to a black bicycle on a city street. The person is holding the handlebars and the seat. The bicycle has a black frame and a black rear rack. In the background, there is a metal railing with a white lattice pattern and a tree trunk. The scene is brightly lit, suggesting daytime. The text "URBAN ESSENTIAL" is overlaid in large, bold, white letters. There are several white diagonal lines and a white circle graphic overlaid on the image. A green and black striped graphic is in the bottom right corner.

URBAN ESSENTIAL

YOU-RIDE

AMSTERDAM

BK1000
8434127011847

Easy to transport,
as you can even
fold the pedals

QUESTIONS?

→ FULL POWER FAQ'S

Is it mandatory to wear a helmet?

Yes, it is mandatory to wear a helmet when riding an electric scooter. As of 21 March 2022, the DGT (Spanish General Traffic Division) regulations have changed, and if you ride without a helmet, you can be fined. Moreover, it is very dangerous to ride without a helmet, because you can have an accident and get injured. If you ride a bike and you are under 16, you also have to wear a helmet, just as if you drive on interurban roads (outside the city) you have to wear a helmet, no matter how old you are.

If my product has a technical problem, what do I have to do?

You can take it to the place where you purchased it or to a Youin support point, located throughout Spain. Furthermore, Youin can also arrange a repair report. You can contact our workshop at taller@weareyouin.com. Remember that you must always provide the purchase invoice.

How do I know if the battery is fully charged?

When the charger indicator is red, it means it is charging. When the indicator is green, the battery is fully charged. What is more, when it reaches 100%, charging will stop automatically to protect it.

How fast can a personal mobility vehicle (PMV) go?

The maximum speed established by European regulations for PMVs is 25 km/h. If they exceed this speed with the help of the motor, they are considered mopeds and are governed by other laws. On electric bikes, the motor stops assisting from 25 km/h, but you can continue pedalling and, if you have more pedalling power, you can reach higher speeds.

How do I clean my electric bike?

The best way to clean the ebike is to use a damp cloth and then a dry one. You should never use pressurised water or other corrosive substances, such as alcohol, as they can damage some parts of the bicycle, especially the electronics.

Can I use my scooter or ebike in the rain?

Youin does not recommend using these products in adverse weather conditions such as rain. Although they have an IP54/IP65 resistance, depending on the model, it is better not to use them on rainy days because they are electronic products.

Is it mandatory to have insurance?

At present, in Spain it is not mandatory to have insurance for electric scooters or bicycles, but it is advisable to have it if you want to avoid headaches in the event of an accident with other people or vehicles involved.

Is the PMV Mobility Certificate necessary?

All electric scooters can be operated without the certificate until 22 January 2027. Scooters that are purchased after 22 January 2024 will have to be certified.
